

I feel XM should be able to broadcast the local weather and Traffic. They are important features that consumers should be able to receive through XM. I hate listening to local broadcasts due to the commercials. XM provides me with what I want and what consumers want; Music, News and weather information without advertising.

The worst part of local broadcasts are the advertisements. Radio has become a detailed CAR COMMERCIAL and I can't stand it.

If it is so important to the FCC tom keep its listeners, STOP the useless advertising and let people enjoy the MUSIC, NEWS and WEATHER.

Thanks!

Matt
